

40V P-Channel Trench MOSFET(Preliminary)

General Description			Product Summary		
 Trench Power technology 			/ _{DS}	-40V	
• Low R _{DS(ON)}			_D (at V _{GS} =-10V)	-70A	
Low Gate Charge			R _{DS(ON)} (at V _{GS} =-10V)	< 6.5mΩ	
Optimized for fast-switching applications			$R_{DS(ON)}$ (at V_{GS} =-4.5V)	< 10mΩ	
Applications					
 Synchronous Rectification in DC/DC and AC/DC Converters 			100% UIS Tested		
 Isolated DC/DC Converters in Telecom and Industrial 				конз	
то-				S S

A. Single pulse width limited by maximum junction temperature.

- B. The maximum current rating is package limited.
- C. The power dissipation P_D is based on $T_{J(MAX)} = 175^{\circ}$ C, using junction-to-case thermal resistance, and is more useful in setting the upper dissipation limit for cases where additional heatsinking is used.

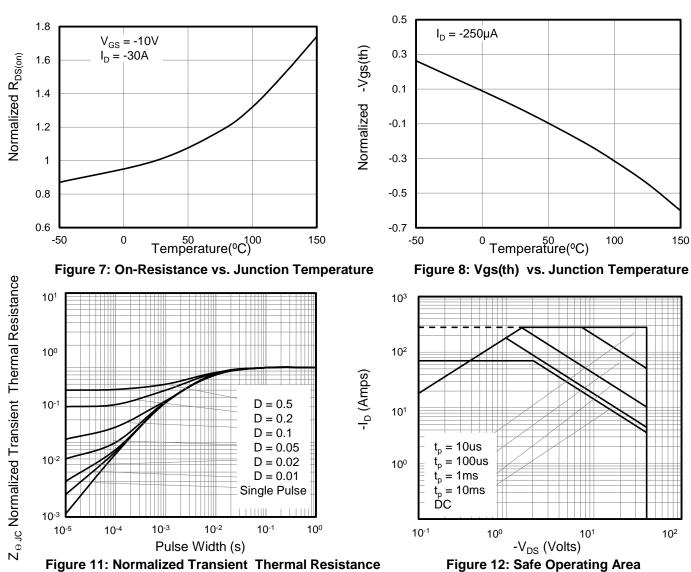

Typical Characteristics $T_J = 25^{\circ}C$, unless otherwise noted

Typical Characteristics $T_J = 25^{\circ}C$, unless otherwise noted

The products shown herein are not designed for use in medical, life-saving, or life-sustaining applications. Customers using or selling Wuxi Unigroup products not expressly indicated for use in such applications do so entirely at their own risk and agree to fully indemnify Wuxi Unigroup for any damages arising or resulting from such use or sale.

Wuxi Unigroup disclaims any and all liability arising out of the use or application of any product described herein or of any information provided herein to the maximum extent permitted by law. The product specifications do not expand or otherwise modify Wuxi Unigroup's terms and conditions of purchase, including but not limited to the warranty expressed therein, which apply to these products.

Wuxi Unigroup Microelectronics CO., LTD. strives to supply high-quality high-reliability products. However, any and all semiconductor products fail with some probability. It is possible that these probabilistic failures could give rise to accidents or events that could endanger human lives that could give rise to smoke or fire, or that could cause damage to other property. When designing equipment, adopt safety measures so that these kinds of accidents or events cannot occur. Such measures include but are not limited to protective circuits and error prevention circuits for safe design, redundant design, and structural design.

In the event that any or all Wuxi Unigroup products (including technical data, services) described or contained herein are controlled under any of applicable local export control laws and regulations, such products must not be exported without obtaining the export license from the authorities concerned in accordance with the above law.

Information (including circuit diagrams and circuit parameters) herein is for example only. It is not guaranteed for volume production. Wuxi Unigroup believes information herein is accurate and reliable, but no guarantees are made or implied regarding its use or any infringements of intellectual property rights or other rights of third parties.
